THE MAGAZINE'S BEST PAGES

The compilation contains the magazines best contributions during the past five years, including features on Architecture, Photography and Design. This limited edition is published in b/w on special paper different from the original magazine.

"Abstract" looks at trends such as the disappearance of limits and loss of identity because of consumerism and entertainment. The selected contributions show a new, elegant stage of the consuming expansions of Occidental and Asian metropolises, where a controlled yet violent mercantilism flourishes more than anywhere else.
