COMPREHENSIVE MONOGRAPH

Lukáš Jasanský and Martin Polák are among the most highly respected living Czech photographers. They express themselves through extensive series of photographs that until now have only been documented separately in smaller catalogues featuring only some of their work. A larger overview and assessment of their oeuvre has been missing. This book is the first English-language publication that includes a comprehensive history of all the series of this photographer-duo.

Published within the context of the series "Tranzit," edited by Vit Havranek, focusing on Central and Eastern European artists.
