DESCRIPTION

The Estate of H.R. Giger and JRP|Editions are proud to present a new lithograph by the visionary Master of surrealism H.R. Giger.

Originally created in 1969 as a red and black silkscreen, the piece was born alongside Giger's iconic *Biomechanoid* series, first published by Galerie Bruno Bischofberger.

Now reimagined in black and striking silver (inspired by the artist's other prints of that period), this lithograph revives the intensity of the original with deep layered black tones and a mesmerizing silver finish to emphasize the complexity and surrealism of the composition. The intricate fusion of organic and mechanical elements is quintessentially H.R. Giger, and showcases his signature biomechanical style.

Produced in close collaboration with Carmen Giger and stamped by the H.R. Giger Estate, this exclusive limited-edition is a must-have for both keen collectors and new admirers of Giger's powerful, otherworldly aesthetic.
